SKILLS

- **Programming Languages** – Python, HTML, SQL
- **Operating Systems –** Windows (Vista, 7, 10), Linux OS (Kali, Ubuntu)
- **Software** (Wireshark, Cisco PacketTracer,Microsoft Word, PowerPoint, Excel)
- Effective communicator and listener

PROJECTS

Optum Project – Worked with Optum to create an API to make healthcare more effective for everyone. We wanted to save time and money of data entry so healthcare can focus more on the patient

Federated Insurance Project – We worked closely with Federated Insurance and helped make a CRM for them that they might use to improve their service and interactions with their customers. We used our skills from other courses to make Entity Relationship Diagrams, Data flow Diagrams and a User Interface.
